

Delivering your corporate **net zero** goals

Turley

Our net zero expertise

We are net zero carbon experts. Our Sustainability team supports our clients to achieve their net zero goals whether for new development, new products or at a corporate level.

At a corporate level we work across all sectors guiding organisations to achieve their net zero ambitions. Our service matches your needs, including:

- Full strategy to implementation
- Defining what net zero means for your organisation
- Calculating the baseline of where you are
- Stakeholder engagement
- Intervention and investment proposal and analysis
- Monitoring and evaluation
- Material analysis
- Meeting Science Based Targets initiative (SBTi)
- Scope 1, 2 and 3 review
- Asset management

Why Turley?

We have the perfect team to help your organisation achieve its goals around the net zero carbon transition.

The issue of net zero can seem so big, complex and contradictory that it can be difficult to know where to begin. There are so many schemes, acronyms, technologies and sources of information. Our team navigates these using a combination of analytical, engineering and strategic skills. Our experience blends an understanding of those policies and regulations, a detailed understanding of technologies, and understanding how net zero may impact an organisation.

We work with the public and private sector, advising companies, cities and regions on the net zero transition. Members of our team work on industry bodies and advise the Government so we have an in-depth understanding of the current issues and direction of policy.

Once we've completed the analysis we will work with you to develop a strategy which puts your organisation on the best path to avoid the pitfalls and take advantage of the huge opportunities of net zero.

Our net zero clients

We work for clients across sectors advising on policy, corporate net zero, construction and specific products.

Russell WBHO, a Manchester based main contractor, has set their goal to be net zero by 2038. We reviewed their strategy and their aims around vehicles, solar power, site plant, office use and other opportunities to deliver the goal. Through engagement and analysis we verified how reasonable the strategy was, identified minor improvements to it, and explored new opportunities, considering their commercial position. We continue to work with them on their aims to construct net zero developments and also annual validation of their roadmap through to 2038.

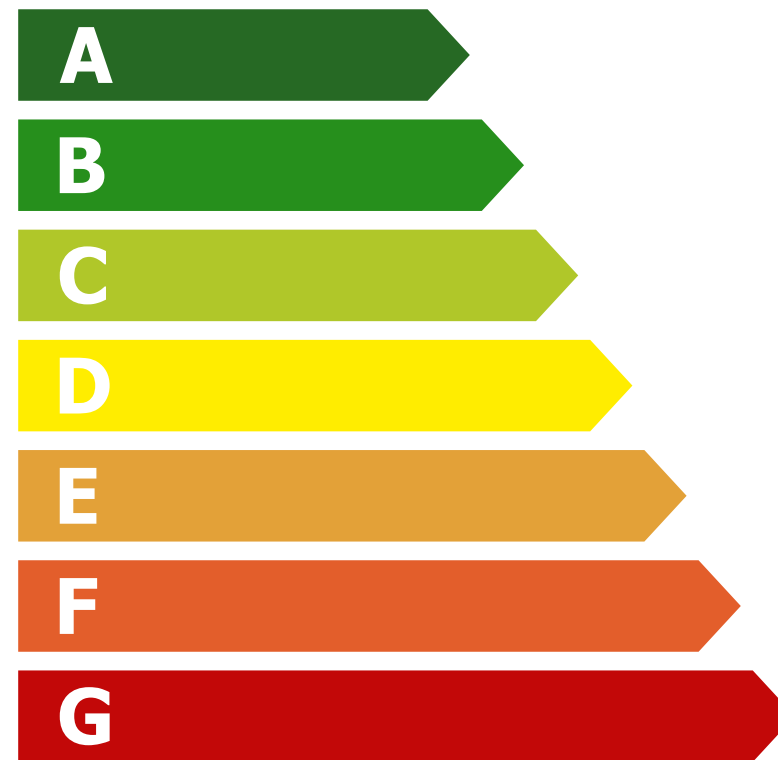

We are supporting IM Properties as they develop a streamlined approach to net zero at a corporate, development and asset management level. This is seeking to align the requirements of frameworks at a company level (SBTi, CarbonNeutral Protocol), investment and asset management level (BBP, CRREM) and development level (UKGBC) considering future industry initiatives such as the proposed alignment of SBTi and CRREM.

Working with Climate Impact Partners, we have supported the following clients:

- Argent
- Pandora Jewellery
- Rolls Royce Finance Partners
- AECOM
- World Gold Council
- CEMEX
- Girls Day School Trust
- FILM London
- Landsbankinn
- Informa
- Gemserv
- PM Group
- Bloom & Wild

WHY BOTH LEFT AND RIGHT ARE WRONG ABOUT NET ZERO

4th August 2022 by Barny Evans — 2 Comments
★★★★ 4.1 (13)

THE AUTHOR

Barny Evans
Barny Evans is a sustainability focused professional for Turley's development, existing organisational level. He has leadership with strong understanding and experience in the energy sector for 17 years on the full range of projects advised city leaders and international organisations.

www.linkedin.com/in/barnyevans99817512

...by Lord Frost and it depressed me. At senior political levels, there is still a lot of confusion about what is going on in our energy system.

...polarised debate where those on the left and right see the world differently. We have seen similar discussion in the past.

Logistics and net zero: a hot topic

Newly appointed Director in our Sustainability team, Barny Evans, hits the ground running with his first blog on logistics and net zero. Read on to find out why it's so important, how it can be achieved and more information on our net zero campaign.

Comment

What does the net zero city of the future look like?

Most cities and many towns have set net zero carbon target dates. They are committed to their transformation, and this will interact strongly with societal changes post-COVID and technological developments. Director, Barny Evans glimpses into the future to consider a net zero future, the challenges that need to be done and some of the solutions.
